## Programming Experience

### Social Network (Bootcamp Project)

Participated in developing a social network from scratch using JavaScript, React, Node.js, Express, and MongoDB. Implemented features such as user management, posts, and password encryption with JWT, efficiently integrating frontend and backend.

### DanceTapp (Final Project)

Designed and developed an application to search for and publish dance events. Implemented user roles (organizer and dancer), efficient data management with MongoDB and fetch, and password encryption with JWT. The project focused on scalable architecture, an intuitive interface, and key features such as event creation, filtering, and management, providing an optimized user experience.

## Languages

**Spanish** - Native

**English** - Basic

**Catalan** - Advanced

**Italian** - Advanced

## Other Information

- Driver's License (Category B) and own vehicle
- Immediate availability
- Flexible hours and willingness to travel

 643 139 168
